

Password Generator

Presentation

The project

The Mission :

- Develop a password generator in C language.
- For all users (children, senior, customers, ...)

You can :

- Choose
- Create
- Save !

Example

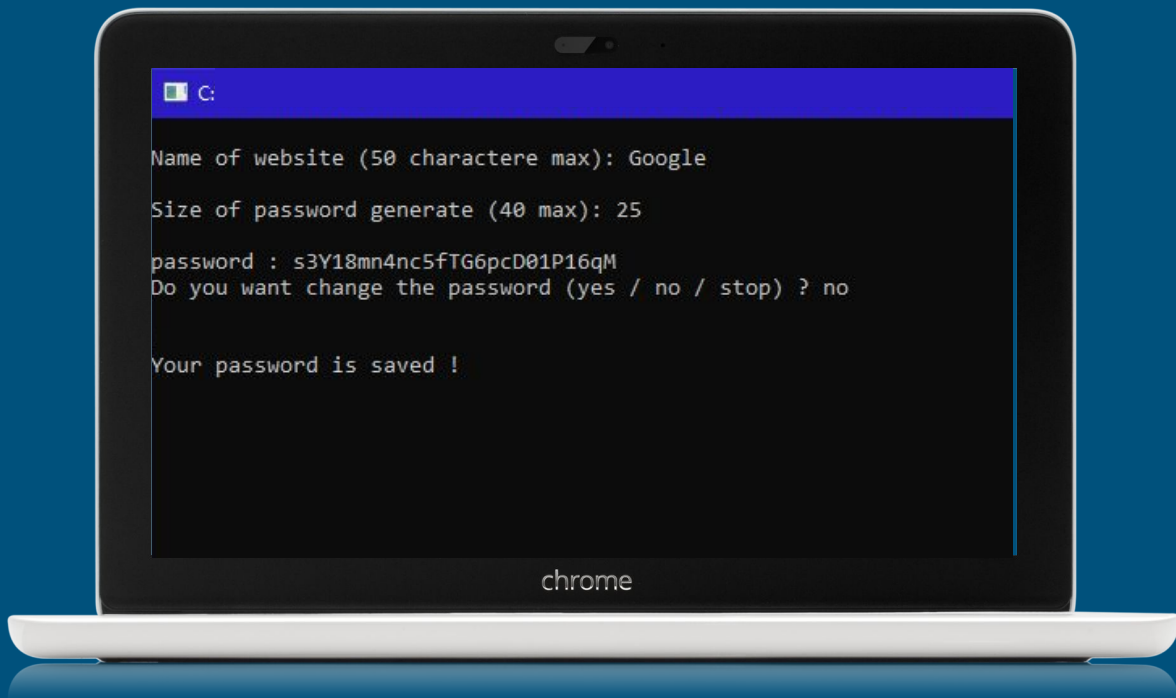

Generate a password !

Just click on the .exe

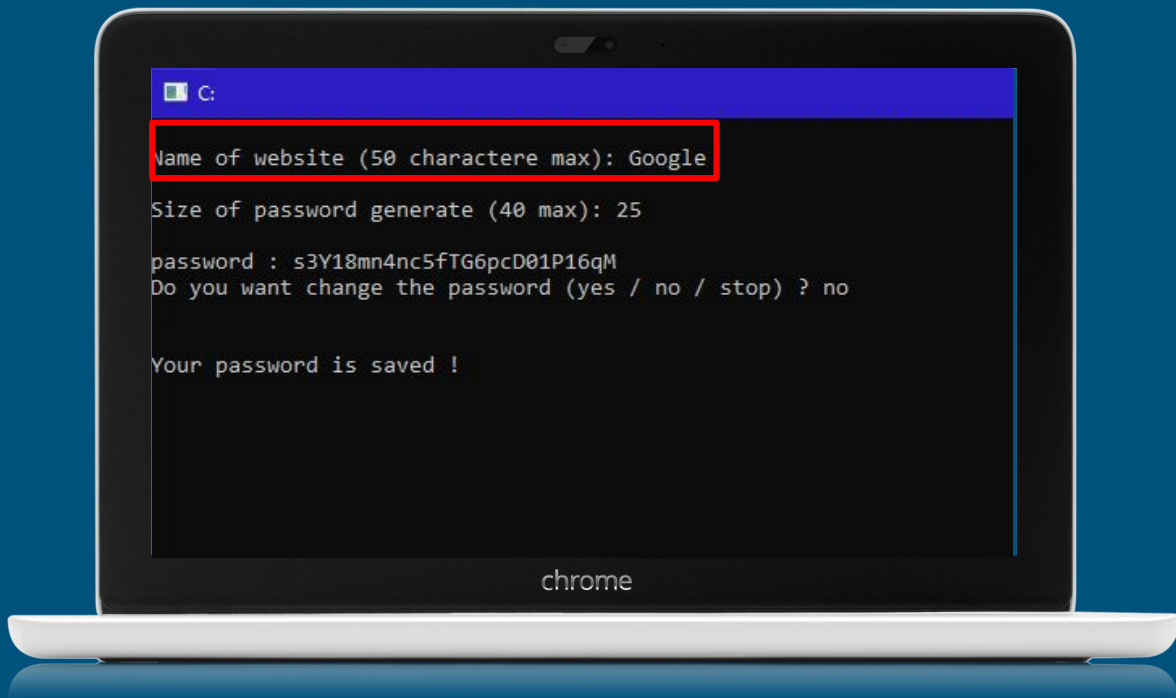

Generate a password !

A window opens

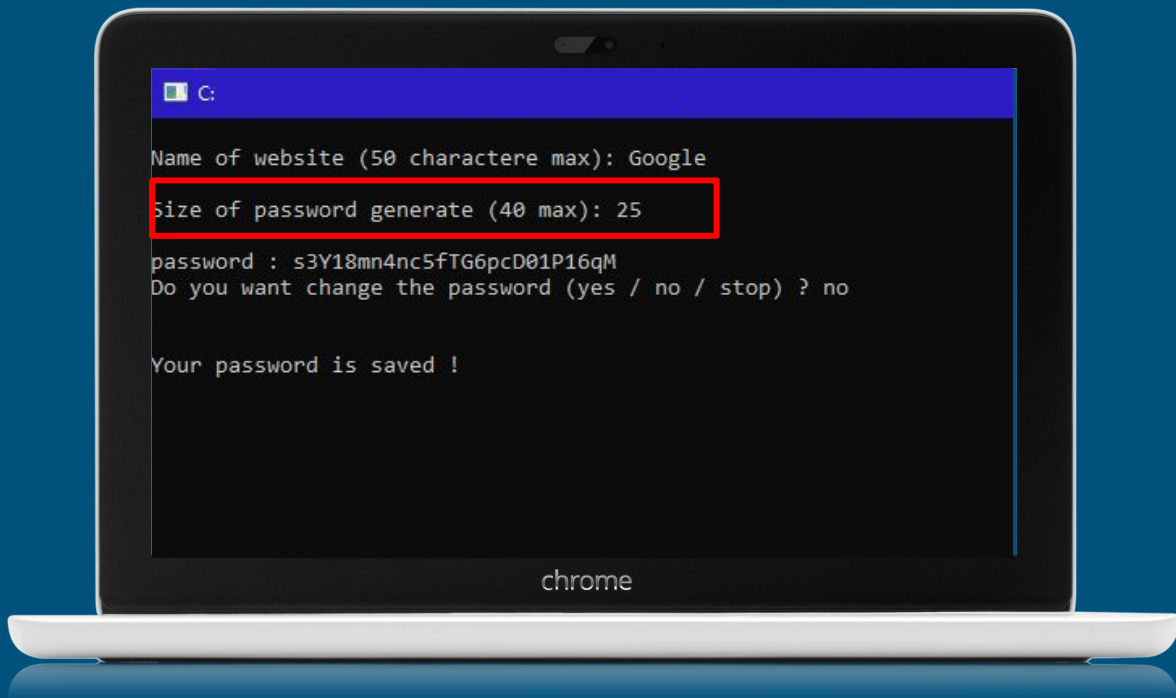

Generate a password !

Choose your website

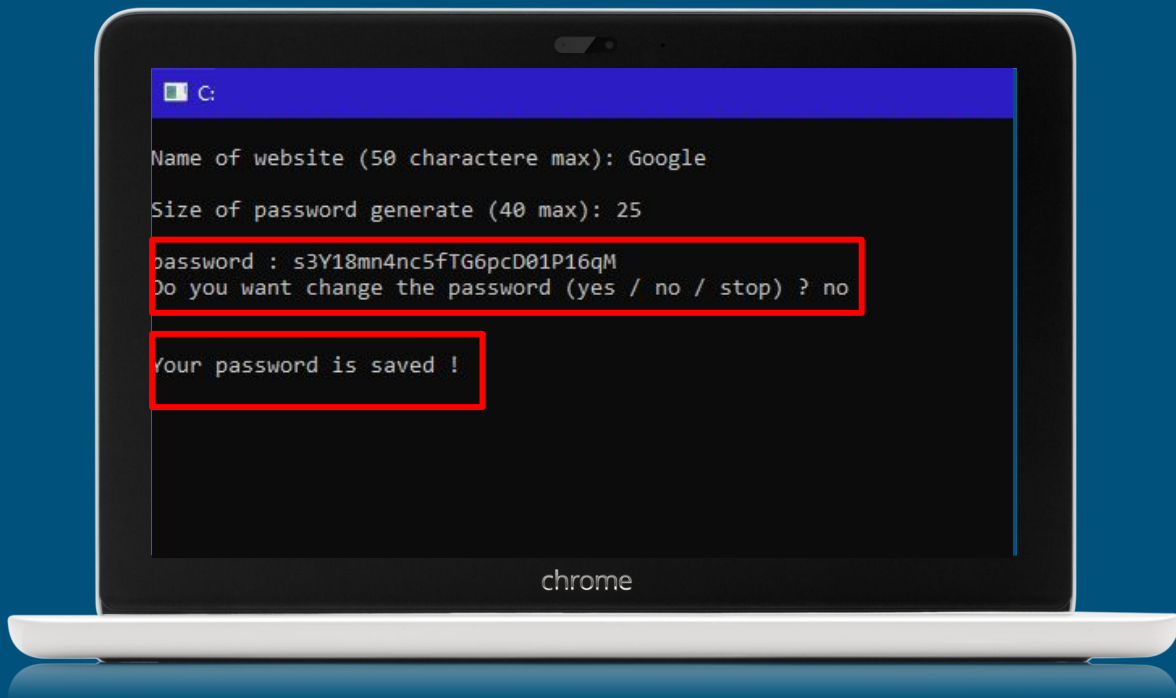

Generate a password !

Choose the size

Generate a password !

discover your password and save it !

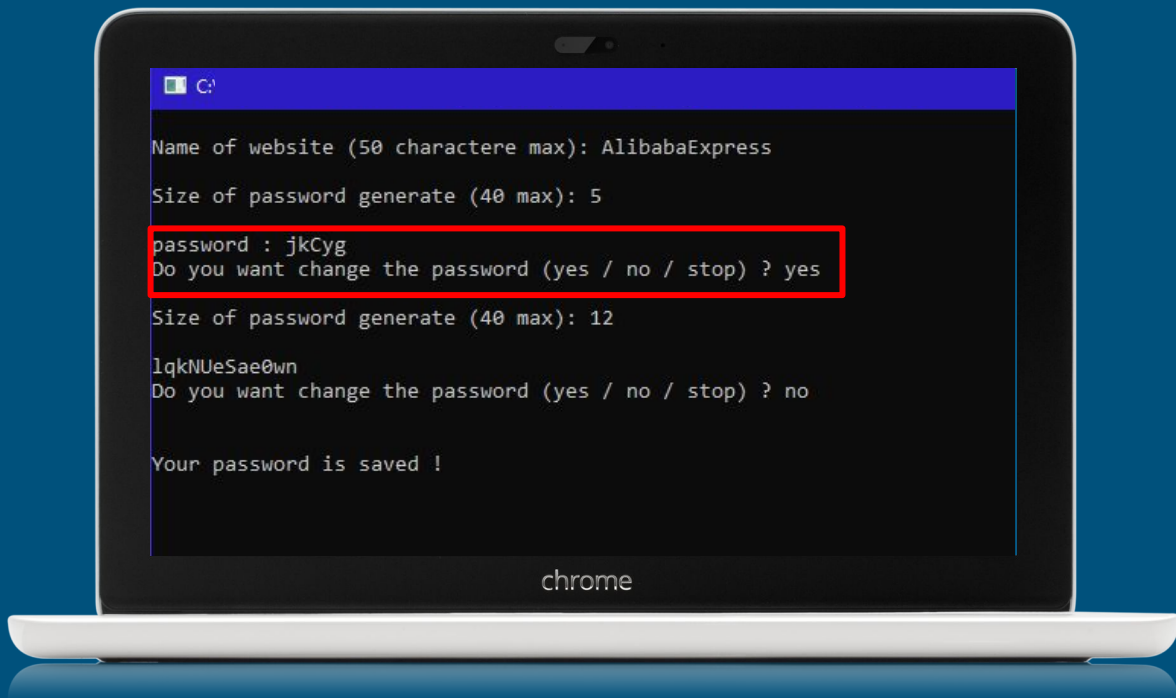

Choose your favorite !

Choose an other password

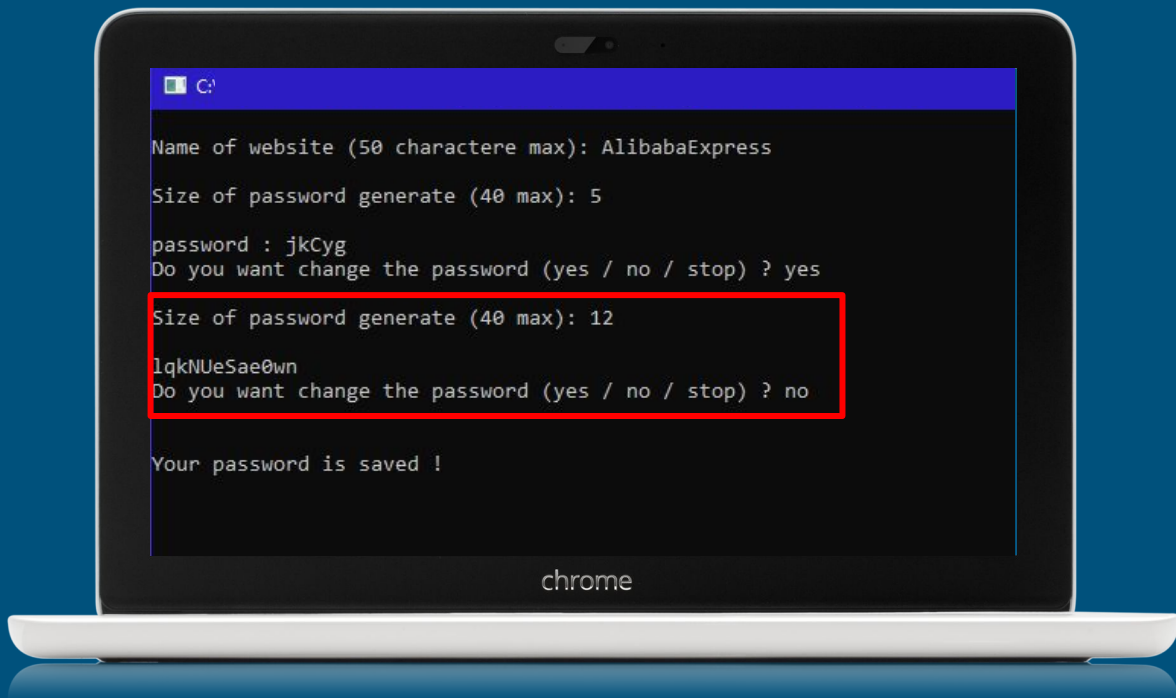

Choose your favorite !

Choose an other password

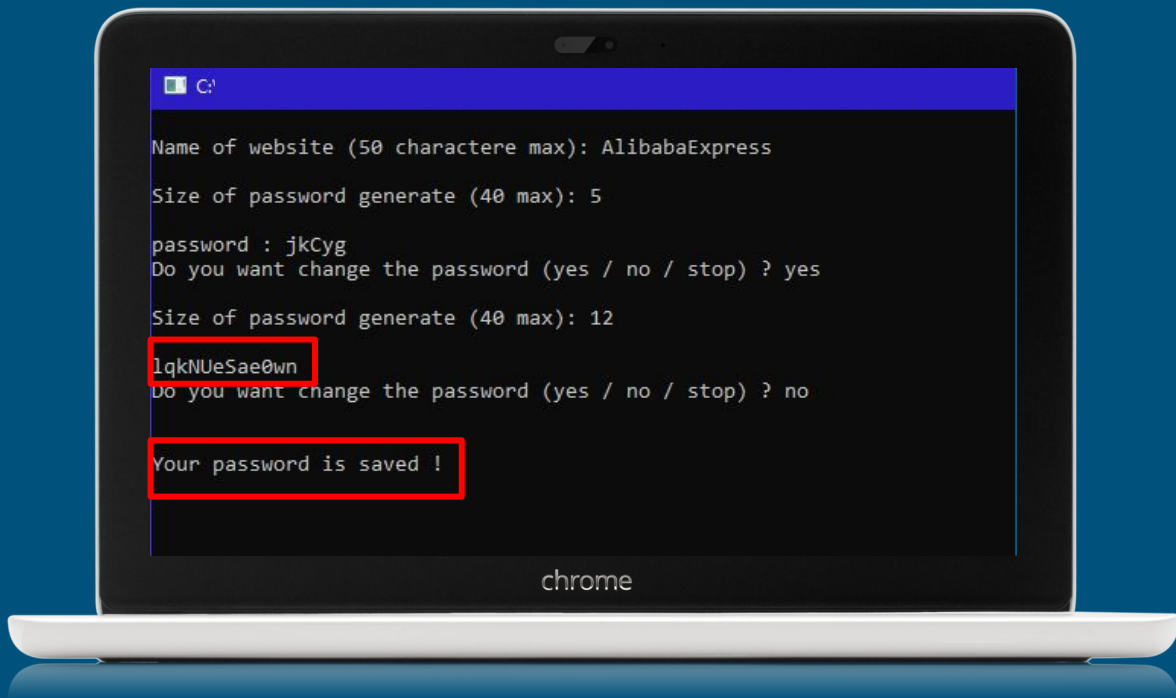

Choose your favorite !

generate a new password !

Choose your favorite !

Save the new password !

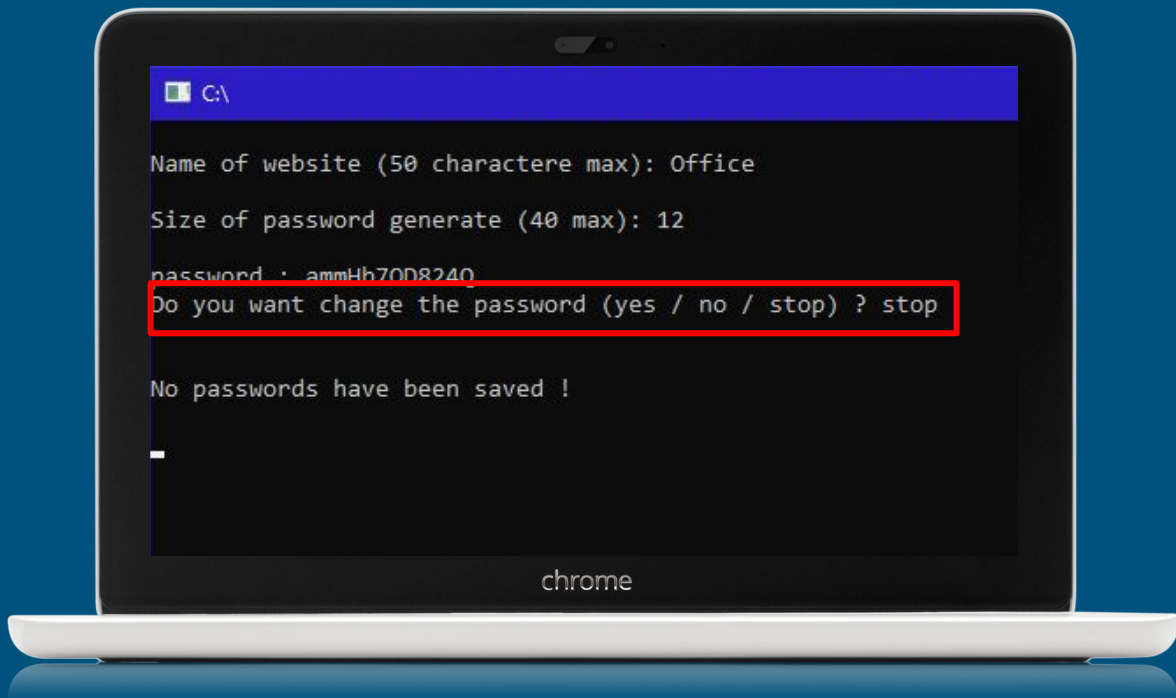

Stop the save !

you made a mistake ?

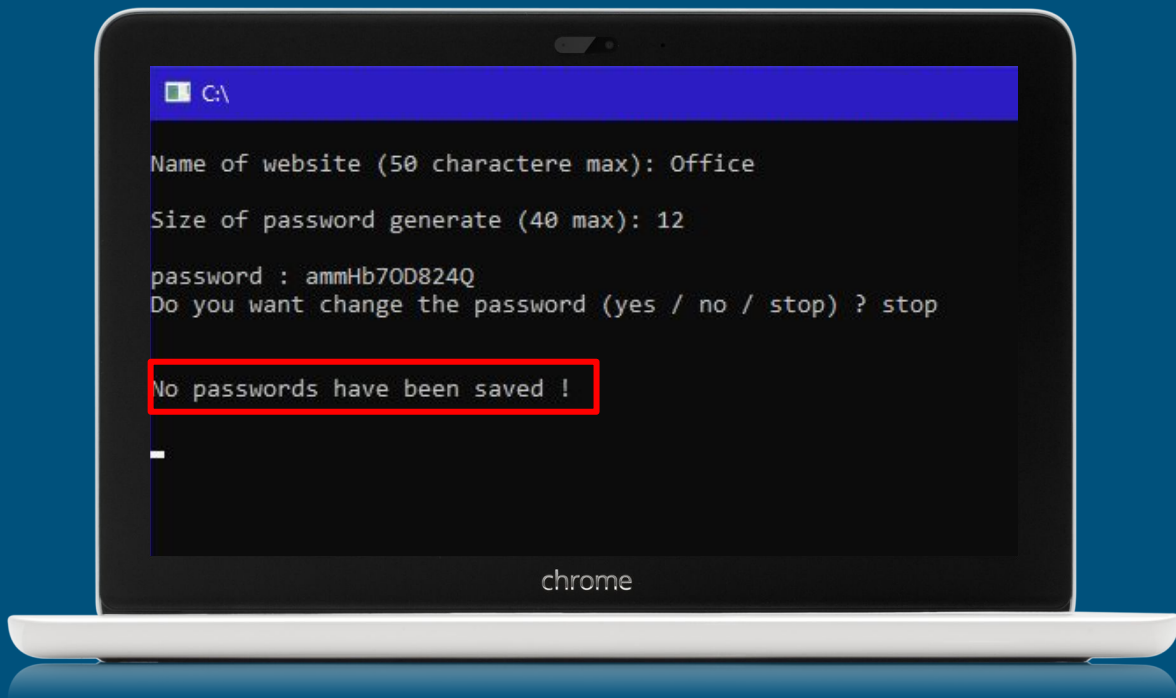

Stop the save !

Stop the program

Stop the save !

the disaster is avoided !

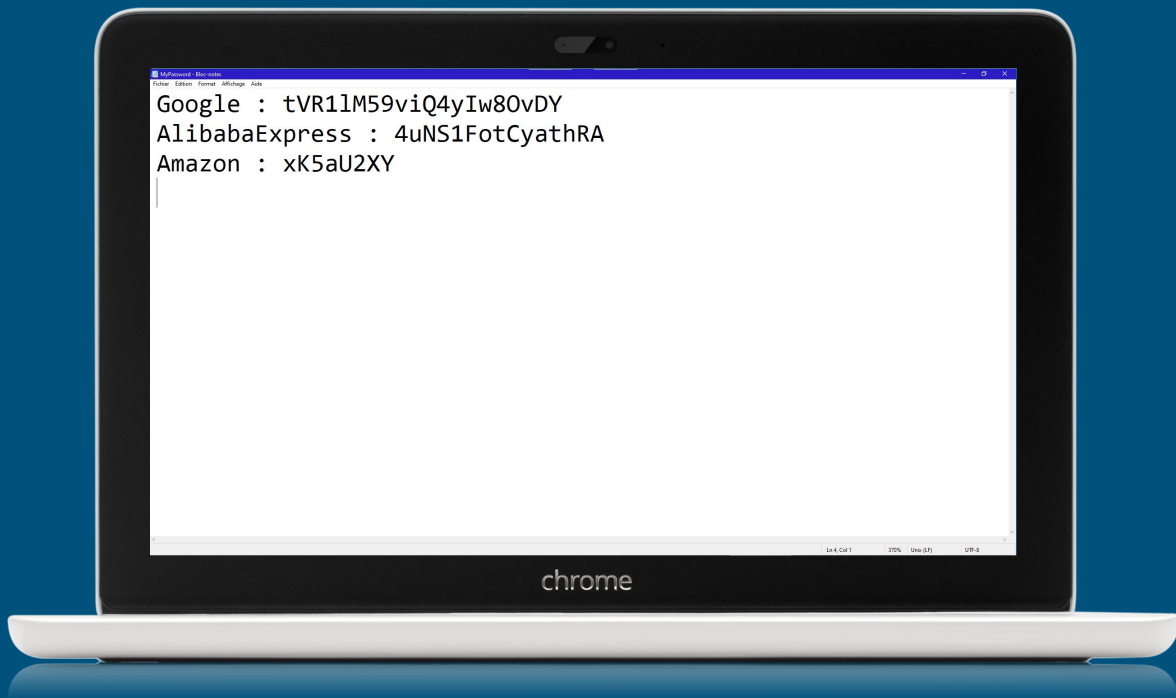

Your saved passwords

recover your passwords

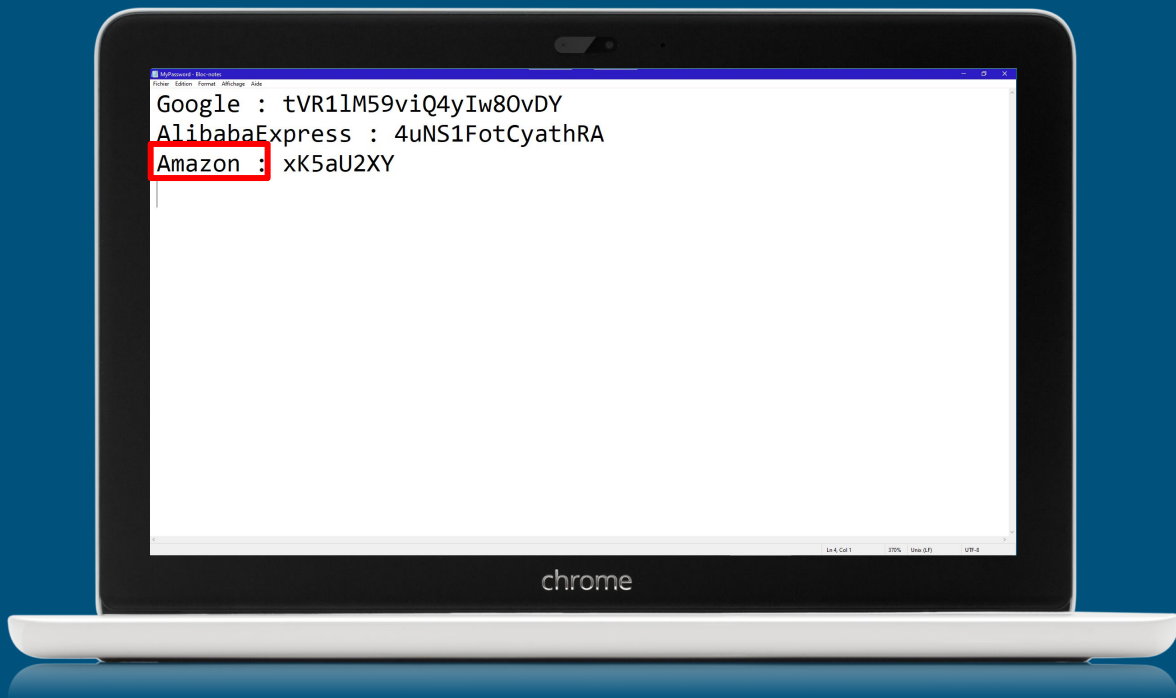

Your saved passwords

open the .txt file.

Your saved passwords

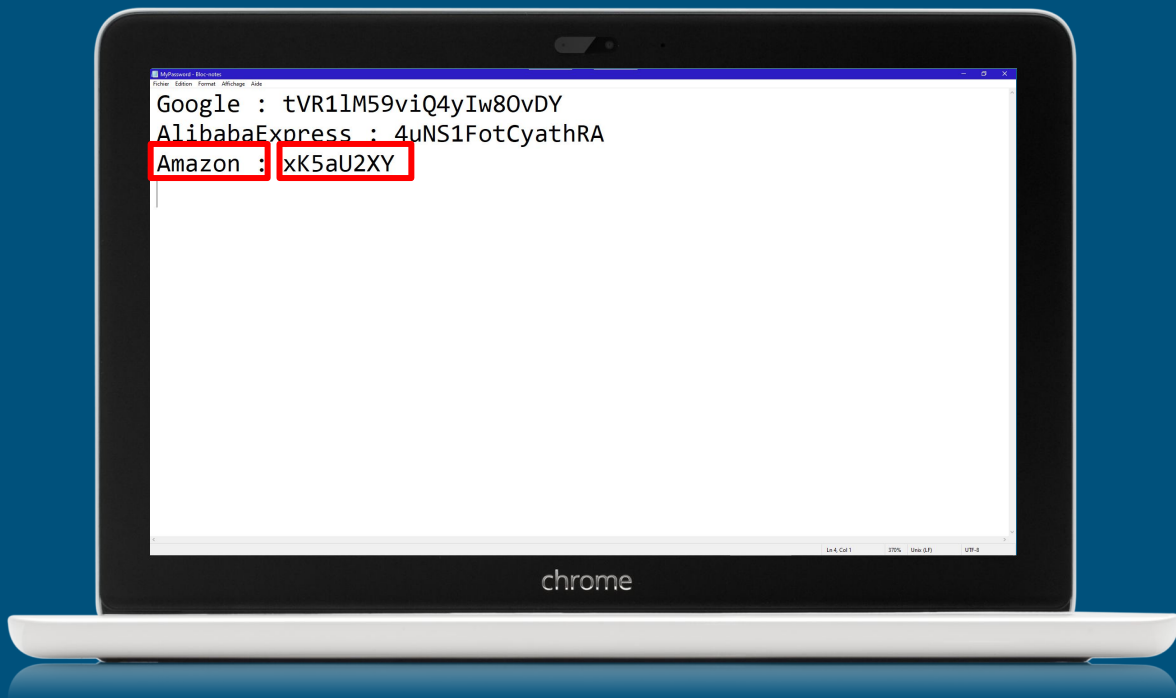

recover your website

Your saved passwords

recover your website

recover your passwords

The Code

Header code

```
1  #include <stdio.h>
2  #include <stdlib.h>
3  #include <time.h>
4  #include <string.h>
5
6  #define NB_LETTRES 26
7  #define NB_NOMBRE 10
8  #define NB_TYPE 3
9
10 #define CHAR_MAX 50
```

Include directives

```
1  #include <stdio.h>
2  #include <stdlib.h>
3  #include <time.h>
4  #include <string.h>
5
6  #define NB_LETTRES 26
7  #define NB_NOMBRE 10
8  #define NB_TYPE 3
9
10 #define CHAR_MAX 50
```

Constantes Values

```
1  #include <stdio.h>
2  #include <stdlib.h>
3  #include <time.h>
4  #include <string.h>
5
6  #define NB_LETTRES 26
7  #define NB_NOMBRE 10
8  #define NB_TYPE 3
9
10 #define CHAR_MAX 50
```

New type definition

```
11
12  typedef char alphabet[NB_LETTRES];
13
14  const alphabet minuscules = {'a','b','c','d','e','f','g','h','i','j','k','l','m','n','o','p','q','r','s'}
15
16  const alphabet majuscules = {'A','B','C','D','E','F','G','H','I','J','K','L','M','N','O','P','Q','R','S'}
17
18  const char nombres[NB_NOMBRE] = {'0','1','2','3','4','5','6','7','8','9'};
19
```

Constante variables

```
11
12  typedef char alphabet[NB_LETTRES];
13
14  const alphabet minuscules = {'a', 'b', 'c', 'd', 'e', 'f', 'g', 'h', 'i', 'j', 'k', 'l', 'm', 'n', 'o', 'p', 'q', 'r', 's',
15
16  const alphabet majuscules = {'A', 'B', 'C', 'D', 'E', 'F', 'G', 'H', 'I', 'J', 'K', 'L', 'M', 'N', 'O', 'P', 'Q', 'R', 'S',
17
18  const char nombres[NB_NOMBRE] = {'0', '1', '2', '3', '4', '5', '6', '7', '8', '9'};
19
```

Definition of functions

```
20
21 char completePassword();
22
23 int Alea(int max);
24
25 void generatePassword(int max, char password[]);
26
27 void writeFile(char website[], char password[], int max);
28
```

Definition of functions

```
20  
21 char completePassword();  
22  
23 int Alea(int max);  
24  
25 void generatePassword(int max, char password[]);  
26  
27 void writeFile(char website[], char password[], int max);  
28
```

Definition of functions

```
20
21 char completePassword();
22
23 int Alea(int max);
24
25 void generatePassword(int max, char password[]);
26
27 void writeFile(char website[], char password[], int max);
28
```

Definition of functions

```
20
21 char completePassword();
22
23 int Alea(int max);
24
25 void generatePassword(int max, char password[]);
26
27 void writeFile(char website[], char password[], int max);
28
```

Definition of functions

```
20
21 char completePassword();
22
23 int Alea(int max);
24
25 void generatePassword(int max, char password[]);
26
27 void writeFile(char website[], char password[], int max);
28
```

Main()

```
79  int main(){
80
81      srand(time(NULL));
82
83      //Initialisation
84      int max ;
85      char password[CHAR_MAX];
86      char choice[CHAR_MAX];
87      char website[CHAR_MAX];
88
89      printf("\nName of website (50 caractere max): ");
90      scanf("%s",website);
91
92      printf("\nSize of password generate (40 max): ");
93      scanf("%d",&max);
94
95      generatePassword(max,password);
96      printf("\npassword : %s",password);
97
```

Main()

```
79  int main(){
80
81      srand(time(NULL));
82
83      //Initialisation
84      int max ;
85      char password[CHAR_MAX];
86      char choice[CHAR_MAX];
87      char website[CHAR_MAX];
88
89      printf("\nName of website (50 caractere max): ");
90      scanf("%s",website);
91
92      printf("\nSize of password generate (40 max): ");
93      scanf("%d",&max);
94
95      generatePassword(max,password);
96      printf("\npassword : %s",password);
97
```

Main()

```
79  int main(){
80
81      srand(time(NULL));
82
83      //Initialisation
84      int max ;
85      char password[CHAR_MAX];
